SUMMARY

B.Tech Computer Science (AI & ML) student at Kalasalingam Academy of Research and Education, focused on Python, machine learning, and full-stack web development. Has built and deployed multiple end-to-end projects spanning predictive ML models, interactive data dashboards, and a Flask-based full-stack web application. Actively seeking a Software Engineering / AI-ML internship to apply and grow these skills in a real-world team setting.

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS, JavaScript

AI / Machine Learning: Machine Learning, scikit-learn, XGBoost, pandas, NumPy, Artificial Intelligence

Web Development: Flask, Flask-SQLAlchemy, Flask-Login, Flask-Bcrypt, Streamlit, Bootstrap 5

Databases: MySQL, SQLite

Tools & Visualization: Git, GitHub, matplotlib, seaborn, plotly, Chart.js, unicorn

EXPERIENCE

Cloud Computing Intern — Beeskilled

Aug 2026 – Present | Remote

- Working as a remote Cloud Computing Intern with a focus on AWS, contributing to assigned cloud computing projects and tasks.
- Gaining hands-on, practical experience with cloud computing concepts and workflows through project-based assignments.

Machine Learning Intern — Corizo Edutech Pvt. Ltd.

May 2026 – Jun 2026 | Remote

- Completed a one-month remote Machine Learning training program, building foundational, practical knowledge of ML concepts.

PROJECTS

Groundwater Prediction System — Machine Learning

Python · Flask · scikit-learn · XGBoost · pandas · NumPy · matplotlib/seaborn

- Built an ML-based system to predict groundwater availability and borewell success using rainfall, soil, geology, and historical groundwater data, aimed at helping farmers and authorities make water-management decisions.
- Trained and evaluated prediction models with scikit-learn and XGBoost; implemented the Flask/Flask-SQLAlchemy backend and deployed it with Unicorn.

Stock Prediction Terminal — ML Analytics Dashboard

Python · Streamlit · scikit-learn · pandas · yfinance · plotly

- Developed a stock price prediction and investment-advisory dashboard with a modular pipeline (data loading, preprocessing, model training, evaluation, visualization) using scikit-learn and pandas.
- Pulled live and historical market data via yfinance and built an interactive analytics interface in Streamlit with Plotly charts and user authentication.

Academix — Online Quiz System

Python · Flask · Bootstrap 5 · MySQL/SQLite · Chart.js

- Built a full-stack MCQ practice platform with student/admin roles, a timer-based assessment flow with auto-submit, and instant color-coded grading.
- Added Chart.js performance analytics, PDF scorecard export, and CRUD admin dashboards, with auth via Flask-Login and Flask-Bcrypt.

EDUCATION

B.Tech, Computer Science (AI & ML) — Kalasalingam Academy of Research and Education

Aug 2024 – Jul 2028

Intermediate (Class XII), MPC — Sri Chaitanya College of Education

Jun 2022 – Apr 2024
